

Confidence In Cyberspace

[Dramatic music plays]

Jay James (Caucasian male)

Any device that you use to process information can be dangerous if used in a way that it's not intended to.

Narrator (male voiceover)

As a major player in securing cyber space, IAD is often called upon to assist Community partners, the military, and the defense and commercial industry base. The data and information landscape is unprecedented in its size and complexity with so many systems and networks, across a disparate and distributed user base. IAD's technologically advanced security solutions ensure the right people have access to the right data at the right time.

On screen TRANSITION to IAD Director Debora Plunkett.

Debora Plunkett (African American female)

Information assurance now has become so important to so many customers and clients and even to the average citizen: everybody is concerned about protecting their information, and protecting their infrastructures. What we have are years and years of experience doing so, and that really is what separates us.

Narrator (male voiceover)

IAD advances the Nation's security posture to dynamically defend our networks against existing and emerging threats, while achieving sustainable outcomes with increased speed and efficiency.

On screen TRANSITION to Subject Matter Expert Murray W. Kenyon.

Murray W. Kenyon (Caucasian male)

We have more and more been getting asked by non-DoD agencies to lend our expertise to the things that they need to do.

On screen TRANSITION to Subject Matter Expert Neil Ziring.

Neil Ziring (Caucasian male)

But what they're seeing now is that they're now under attack by Nation state level actors, that's sort of a whole different level of resource and technical backing that a large Nation can bring to bear against a target.

Narrator (male voiceover)

That's why IAD is often the "first call" when our nation needs to respond to emergency cyber situations in defense of our most critical infrastructures.

On screen TRANSITION to Subject Matter Expert Col. James A. Donnelly.

Col. James A. Donnelly (Caucasian male, U.S. Army) If you have to remember seventeen passwords to log on to the system, and you're in a vehicle and you're rolling down the road and someone is shooting at you and you're hot and tired, it's not usable anymore.

Narrator (male voiceover)

As the nation's foremost experts on assuring information, IAD has a long history of attracting visionaries and innovators - individuals who embrace challenges.

On screen TRANSITION to Subject Matter Expert Margaret Salter.

Margaret Salter (Caucasian female)

What we do is we hire smart, and then we make sure that smart has the room to grow and we really don't constrain them in very many ways.

On screen TRANSITION to Narrator

Narrator (male voiceover)

IAD continues to build our comprehensive capabilities with the same expertise and commitment to the assurance mission we've always shown --- constantly evolving to secure what matters most.

On screen TRANSITION to Subject Matter Expert Murray W. Kenyon.

Murray W. Kenyon (Caucasian male)

The sad truth is the adversary has to be lucky once and the defender has to be good all the time.

On screen TRANSITION to Subject Matter Expert Dr. Aaron Ferguson.

Dr. Aaron Ferguson (African American male)

I'm doing something that influences history, something that puts the United States in a position to protect what we take for granted. And, well, this matters in a big way.

[ON SCREEN TEXT: (IAD logo)
FORWARD. THINKING.]
